

# Your health. Our priority.

## Discover new solutions to address your unique skincare needs

Your health is our priority. With high-quality solutions personalised to you, we provide a targeted approach designed to address your specific skincare needs. Our commitment to exceptional customer service ensures a positive and empowering experience on your path to better health.

We're excited to launch five new prescription face creams designed to address anti-aging along with your specific dermatological concerns.

Powered by PCCA's unique delivery systems, Biopeptide Biocosmetic™, VersaBase® and XemaTop™, our new prescription anti-aging creams are designed to address your unmet dermatological needs.

## PCCA's personalised medicine for skincare

- **No1 Anti-aging face cream**  
**Biopeptide Biocosmetic™**  
Targeted treatment against lines, wrinkles and sagging.
- **No2 Moisturising face cream**  
**XemaTop™ cream base**  
Designed to soothe and nourish dry and irritated skin, especially for dermatitis, eczema, psoriasis and xerosis.
- **No3 Restore face cream**  
**VersaBase® cream base**  
Precision treatment for acne and other facial blemishes.
- **No4 Rosacea face cream**  
**VersaBase® cream base**  
Developed to minimise facial redness and irritation.
- **No5 Skin lightening face cream**  
**VersaBase® cream base**  
Formulated to even complexion, reduce dark spots and patches.

## Products personalised for you

Our facial creams are formulated in a two-step process, allowing for tailored treatment. Your prescriber will:

1. Select the face cream that best suits your skin type or condition: No1-No5.
2. Add a personalised hormone depending on your clinical need: Estriol, Estradiol or Progesterone.

Talk to your prescriber today about how our new face creams can be part of your personalised skincare solution.

## Your health, our priority

Your health is unique, your treatment should be too. We collaborate closely with your prescriber to formulate personalised medicines that address your specific needs, ensuring your treatment empowers you to live your best life.

## Have a question?

Our pharmacists and patient care team are here to personally discuss your medications, answer your questions, and address any concerns.
