

Your hair loss, our priority.

Discover our new solutions targeting your hair loss concerns

Hair loss can affect anyone, and we understand that its impact goes far beyond cosmetic concerns.

That's why we're launching new prescription hair loss products designed to address your unique needs.

The science behind our new hair loss product

- **Minoxidil**
Can increase the blood flow to hair roots, stimulating the growth of new and existing hair.
- **Progesterone**
Can keep hair in the growing phase, preventing hair loss and stimulating faster growth.
- **Finasteride**
Can promote scalp hair growth and prevent further hair loss.
- **Estradiol**
Can stimulate hair follicles and regulate growth to help address hair loss.
- **Tretinoin**
Can stimulate hair growth and enhance the effectiveness of minoxidil.
- **Cyproterone acetate**
Can help slow down hair loss and promote hair growth.

Treatments can be formulated to address your unique hair care needs.

Powered by a unique delivery system

Atrevis® hydrogel is our unique, versatile delivery base that underpins our new hair loss products. Its unique polymer and patented ingredients ensure efficient and controlled absorption, improving product delivery through the skin. As it can solubilise ingredients without the need for alcohol, Atrevis® is particularly suitable if you cannot use alcohol-based products.

Talk to your prescriber about our prescription hair loss products. It could be the solution you've been looking for.

Your health is unique, your treatment should be too. We collaborate closely with your prescriber to formulate personalised medicines that address your specific needs, ensuring your treatment empowers you to live your best life.

Have a question?

Our pharmacists and patient care team are here to discuss your medications, answer your questions, and address any concerns.
